PROFESSIONAL SUMMARY

Seventh-semester Software Engineering student with project experience in mobile development with Flutter, backend development with Java and Spring Boot, web development with JavaScript and React, and data analysis with Python. Available for a full-time internship as a software development intern or data analyst.

EDUCATION

Universidad Cooperativa de Colombia — Medellín, Colombia
B.S. in Software Engineering — 7th semester — 2023 – Present

Relevant Coursework: Data Analytics, Software Testing, Software Implementation and Maintenance, Numerical Methods, Differential Equations, Multimedia Programming.

Scholarships: Recipient of the Sapiencia – Participatory Budget scholarship (Medellín).

Colegio Parroquial San Buenaventura — Medellín, Colombia
High School Diploma (Academic Track) — 2012 – 2022

TECHNICAL SKILLS

Languages: Java, Python, Dart, JavaScript, SQL, HTML, CSS
Mobile Development: Flutter, Riverpod, MVVM architecture, SQLite, Firebase
Backend: Spring Boot, Spring Data JPA, REST APIs, Maven, FastAPI, Flask
Web Development: HTML, CSS, Bootstrap, JavaScript, React, responsive design
Data Analysis: Python, Pandas, Jupyter, Google Colab, linear and logistic regression, ANOVA
Databases and Tools: MySQL, SQLite, Firebase, Git, GitHub, Google Cloud Platform
Methodologies: Scrum, software testing | **Spoken Languages:** Spanish (native), English (intermediate, B1)

PROJECTS

Numi — Offline Educational App with AI Assistant — *Team project* — 2026

- Built with a team a Flutter educational app for elementary students in rural areas of Medellín that works without internet, with 15 interactive activities across 5 subjects of the Colombian curriculum.
- Integrated an on-device AI assistant (Gemma 2B with RAG) over a local SQLite knowledge base.
- MVVM architecture with Riverpod; progress synced to a FastAPI backend, with Firebase Auth authentication.

CineX — Cinema Management System (github.com/AlexanderM-Code/CineX---Proyecto-Final) — Nov. 2025

- Developed a REST API in Java 21 with Spring Boot 3, with CRUD operations on 7 resources, including movies, rooms, showtimes, bookings, products, and users.
- Implemented a layered architecture (controllers, services, Spring Data JPA repositories) on a MySQL database.
- Built an HTML, CSS, and JavaScript frontend with an admin panel that consumes the API.

Casa Rendón — Website (casarendon.com) — *Team project* — 2026

- Helped develop and launch the website of an artisanal coffee and wine brand, with React components for the catalog, gallery, testimonials, and FAQ.
- Integrated a visit-booking form with WhatsApp and built a responsive layout with HTML, CSS, and JavaScript.

Data Analysis with Python — *Data Analytics course* — Oct. 2026

- Applied simple and multiple linear regression and ANOVA to predict vehicle fuel efficiency (Auto MPG dataset).
- Built a logistic regression model to classify benign and malignant tumors; data cleaning, exploration, and visualization with Pandas in Jupyter.

BibliotecaDigital v2.0 — *Software Testing course* — 2026

- Served as test lead, designing and executing the test plan for a digital library application.

ADDITIONAL TRAINING

Java Programming Certificate Program — Politécnico de Colombia — In progress
Google Cloud Skills Boost — Hands-on labs: Compute Engine, Cloud Functions, IAM, and load balancing
